Texas Mills and Geography

Consider the image above and then research and answer the following questions:

1. Where are the water-powered mills mostly concentrated?
2. Why are there more watermills than animal mills?
3. Where are the animal- or steam-powered mills mostly concentrated?
4. Why? In order to accomplish this broader question, do the following:
   a. what requirements are needed for each type of mill?
   b. find a topographic map of Texas [see www.topozone.com] or a map of its natural resources
   c. see what correlation there is between the things a mill needs to run and the resources and where they are available.
