

# Ft. Detrick Defense Medical Logistics Center Building Systems Redesign

**April 16, 2008**  
**Senior Thesis Presentation**

**Domenica Ferraro**  
**Penn State University**

**Architectural Engineering**  
**Mechanical Option**

# **Ft. Detrick DMLC**

## **Frederick, MD**

### **Outline**

- Background
- Existing Mechanical Systems
- Redesign Summary
- Redesign Goals
- Mechanical Depth Study
- Architectural/Site Breadth Study
- Electrical Breadth Study
- Conclusions and Recommendations

# Ft. Detrick DMLC

## Frederick, MD

### Background

#### Size

129,960 ft<sup>2</sup>

#### Cost

\$26.5 Million

#### Function

Office

#### Occupants

Top Medical Planning Organizations within the **Department of Defense**, representing the **Army, Navy, Air Force, and Marines**

# Ft. Detrick DMLC

## Frederick, MD

## Background

### AT/FP

Anti-Terrorism/Force Protection

### SPIRiT

Sustainable Project Rating Tool

April 16, 2008  
Senior Thesis Presentation

Domenica Ferraro  
Penn State University

Architectural Engineering  
Mechanical Option

# Ft. Detrick DMLC Frederick, MD

## Existing Mechanical System

*Personal Photo Taken 2/23/08*

### Chilled Water System

- 2 Water-Cooled Chillers at 220 tons each
- 42°F Leaving Water Temperature
- Serves Cooling Coils of AHU-1 thru 6

### Hot Water System

- 2 Gas-Fired Boilers at 2160 MBH each
- Serves AHU heating coils, VAV reheat coils, and Unit Heaters

*Personal Photo Taken 2/23/08*

# Ft. Detrick DMLC Frederick, MD

## Existing Mechanical System

### Airside

- 6 VAV Air Handling Units
- Water Heating and Cooling Coils
- VAV Hot Water Reheat Boxes

*Personal Photo Taken 2/23/08*

## Existing Mechanical System

April 16, 2008  
Senior Thesis Presentation

Domenica Ferraro  
Penn State University

Architectural Engineering  
Mechanical Option

# **Ft. Detrick DMLC**

## **Frederick, MD**

### **Redesign Goals**

1. Decrease Space
2. Increase Energy Efficiency
3. Maintain Affordability
4. Maintain Occupant Safety
5. Improve Sustainability

# **Ft. Detrick DMLC**

## **Frederick, MD**

### **Redesign Summary**

- **Mechanical Depth Study**
  - DOAS/Chilled Beams/High-Induction Diffusers
- **Architectural/Site Breadth Study**
  - Constructed Wetland for On-Site Wastewater Treatment
- **Electrical Breadth Study**
  - Impact of Mechanical Redesign on Electrical System

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Dedicated Outdoor Air System (DOAS)

*Innovent Dedicated Outdoor Air Unit*

- Enthalpy Wheel
  - Recovers Energy
  - Save on Utility Cost

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Dedicated Outdoor Air System (DOAS)

#### Outdoor Air Savings from DOAS-1

	Vot (current design)	Vot 100% OA ( $\Sigma$ Voz)	Difference
AHU-1	4460	2843	
AHU-3	4975	2235	
AHU-5	4670	2120	
Total	14,105	<b>7198</b>	6907

#### Outdoor Air Savings from DOAS-2

	Vot (current design)	Vot 100% OA ( $\Sigma$ Voz)	Difference
AHU-2	4210	1773	
AHU-4	4550	2092	
AHU-6	4985	2584	
Total	13,745	<b>6449</b>	7296

- 100% Outdoor Air
  - Smaller Volume of Air Required
  - Contaminants Not Recirculated

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

Senior Thesis Presentation

Domenica Ferraro  
Penn State University

Architectural Engineering  
Mechanical Option

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Chilled Beams

<http://www.aeieng.com/services/sustainable/chilledbeam.htm>

- Passive System
  - Cool by Convection and Radiation
  - Remove Sensible Loads
  - No Additional Energy to Operate

# Ft. Detrick DMLC

## Frederick, MD

## Mechanical Depth Study

### High-Induction Diffusers

Model TWR

*Nailor High-Induction Diffuser*

- Cooling Supply Air Temperature = 48°F
  - Diffusers encourage mixing of air
  - Prevent “dumping” of cold air

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Goal 1 – Decrease Space

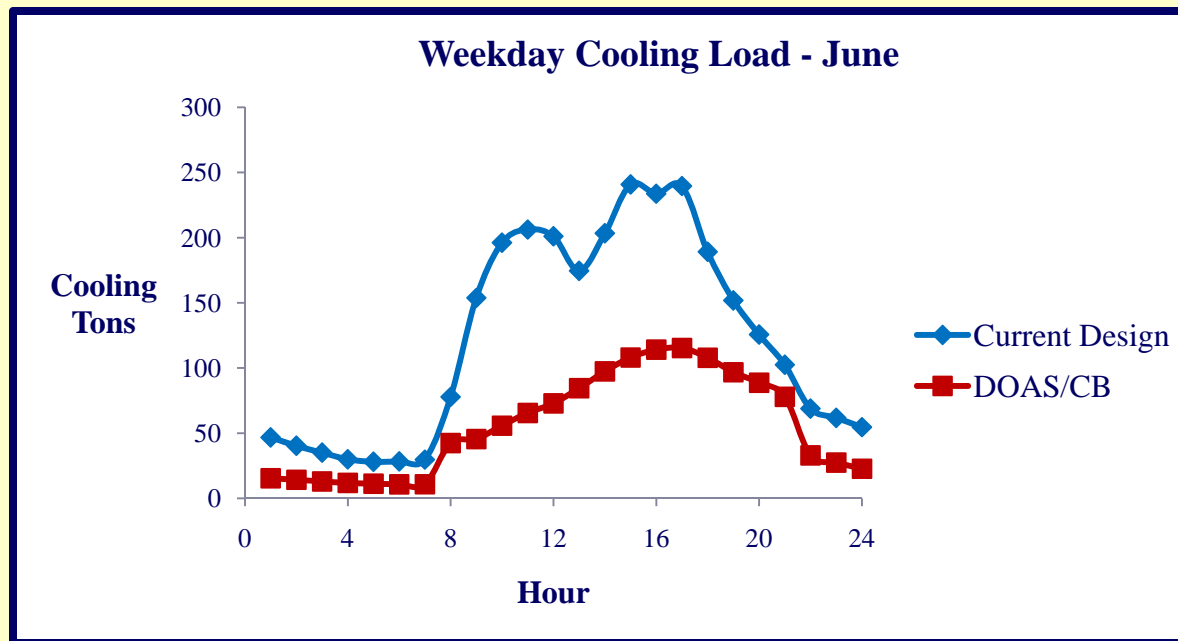

- Existing System
  - 6 Mechanical Rooms
  - 5.2% Lost Rentable Space
- Redesigned System
  - 2 Mechanical Rooms
  - 3.3% Lost Rentable Space
- Owner saves 2392 ft<sup>2</sup> – 2% of Total Area

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Goal 2 – Increase Energy Efficiency

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Goal 2 – Increase Energy Efficiency

Architectural Engineering  
Mechanical Option

# Ft. Detrick DMLC

## Frederick, MD

## Mechanical Depth Study

### Goal 3 – Maintain Affordability

Utility Rates - Baltimore Gas and Electric

Utility Type	Rate Type	Summer Charge	Winter Charge
Electric Consumption	On Peak	\$0.07/kWh	\$0.055/kWh
Electric Consumption	Off Peak	\$0.044/kWh	\$0.04/kWh
Electric Demand	On Peak	\$10.22/kW	\$4.94/kW
Electric Demand	Off Peak	\$4.94/kW	\$4.94/kW
Gas Consumption	-	\$0.4165/therm	

- Existing System Energy Cost: \$164,529/year
- Redesigned System Energy Cost: \$136,252/year
- Yearly Savings: **\$28,277**

# Ft. Detrick DMLC

## Frederick, MD

## Mechanical Depth Study

### Goal 3 – Maintain Affordability

#### Initial Cost Comparison

Equipment	Existing System	Redesign DOAS/CB	Difference
Diffusers (493)	\$20,460	\$21,300	-\$840
VAV Boxes (164)	\$87,740	\$ -	\$87,740
Chilled Beams (1460)	\$ -	\$276,750	-\$276,750
VAV AHUs (6)	\$187,800	\$ -	\$187,800
DOAS Units (2)	\$ -	\$86,000	-\$86,000
<b>Total</b>	<b>\$296,000</b>	<b>\$384,050</b>	<b>-\$88,050</b>

- Existing System First Cost: \$296,000
- Redesigned System First Cost: \$384,050
- First Cost Increase: **\$88,050**

# Ft. Detrick DMLC

## Frederick, MD

## Mechanical Depth Study

### Goal 3 – Maintain Affordability

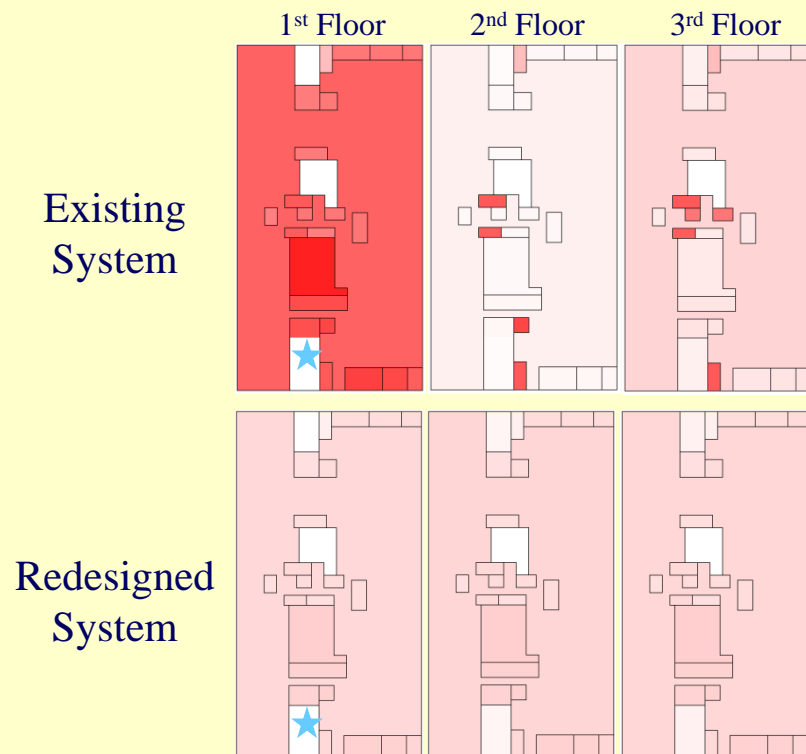

- Existing System Life Cycle Cost: \$1,696,733
- Redesigned System First Cost: \$1,544,041
- 20-Year Life Cycle Cost Savings: **\$152,692**
  - Payback Period: only **3.9** years

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Goal 4 – Maintain Occupant Safety

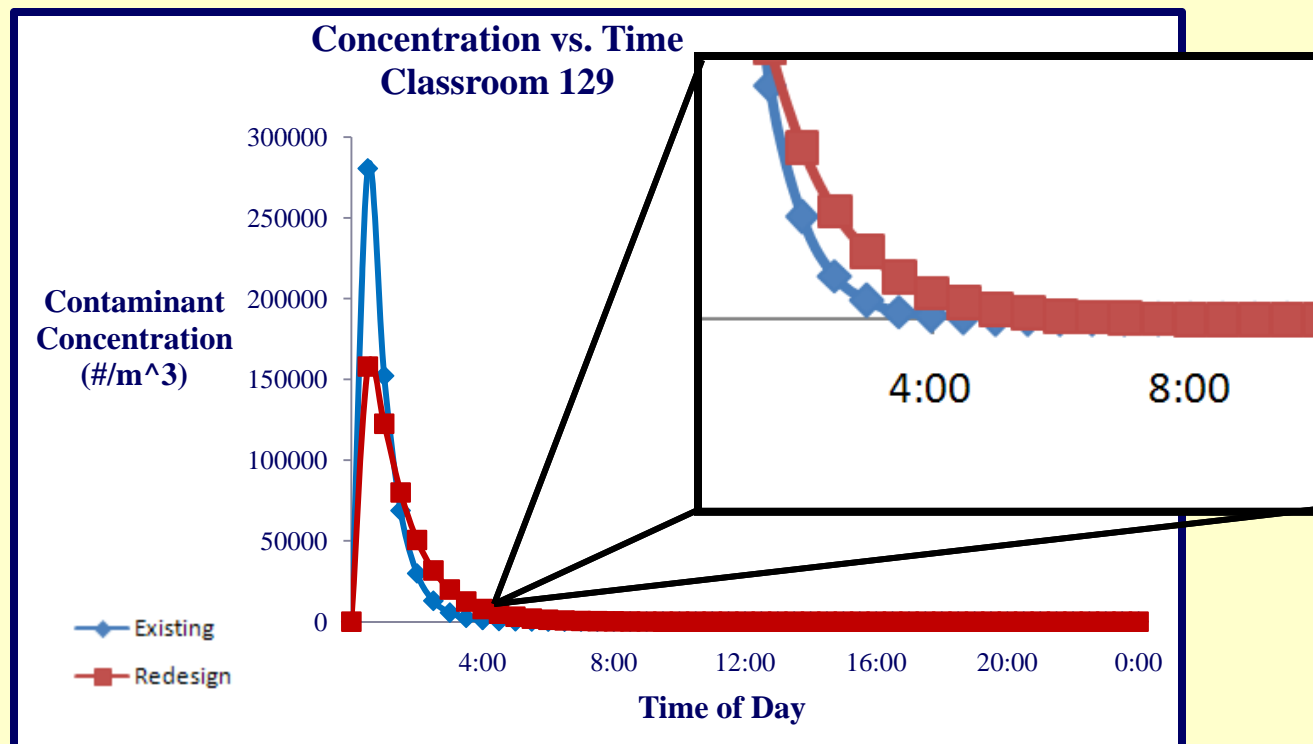

- Simulation of contaminant released in outdoor air intake (star)
- Concentration of contaminants 30 minutes following release
- Existing system has higher initial concentration on first floor
  - Smaller Zones
  - Rest of contamination due to leakage

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Goal 4 – Maintain Occupant Safety

- Redesign takes approximately 2 hours longer to clear the building

April 16, 2008  
Senior Thesis Presentation

Domenica Ferraro  
Penn State University

Architectural Engineering  
Mechanical Option

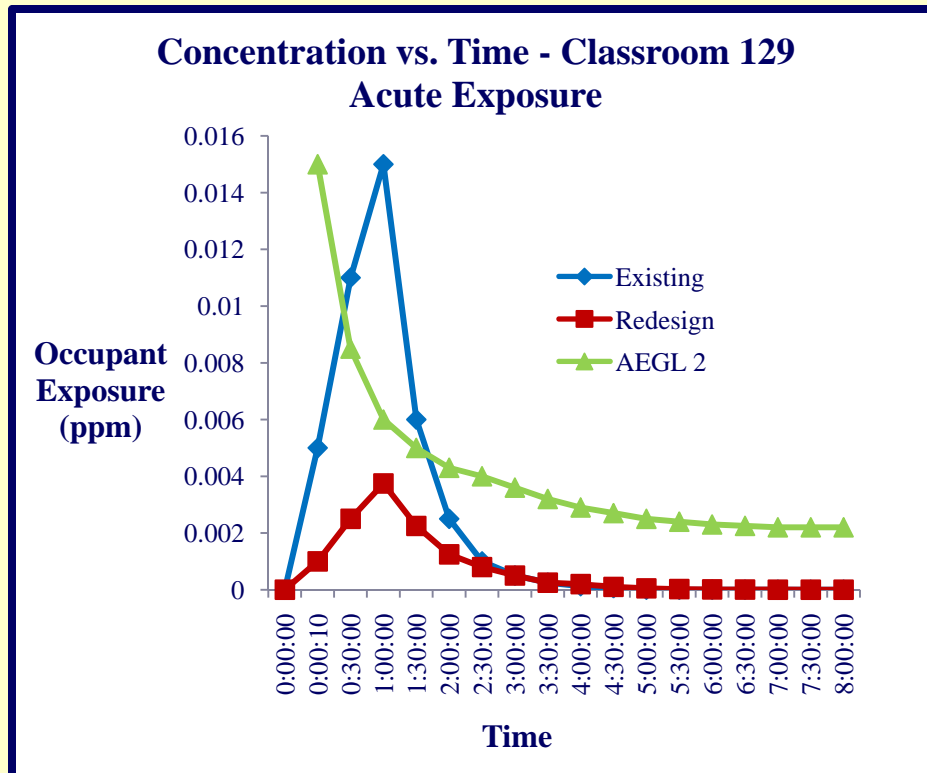

# Ft. Detrick DMLC Frederick, MD

## Mechanical Depth Study

### Goal 4 – Maintain Occupant Safety

- Acute Exposure Guideline Level (AEGL)
  - Describe risk from one-time exposure to contaminants
- Contaminant selected arbitrarily, only intended to display relative concentration between 2 cases
- Redesign never reaches dangerous level – **2 hour difference is not critical**

# Ft. Detrick DMLC

## Frederick, MD

## Mechanical Depth Study

### Goal 5 – Improve Sustainability

#### Existing System

- 43 points – SPiRiT **Silver**
- Need 7 points for SPiRiT **Gold**

#### Redesigned System

- Uses 17.2% less energy than baseline system
- 1 point awarded for every 2.5% reduction of energy
- 6 more points can be obtained, but still need **one more...**

# Ft. Detrick DMLC Frederick, MD

## Architectural/Site Breadth Study

### Goal 5 – Improve Sustainability

<http://www.dep.state.pa.us/Images/>

### Constructed Wetland

- Satisfies SPiRiT credit 2.C2 – Innovative use of wastewater technology
- Use planting beds of wetland vegetation to treat noxious effluents/sewage
- Free water surface – most affordable

# Ft. Detrick DMLC Frederick, MD

## Architectural/Site Breadth Study

### Goal 5 – Improve Sustainability

[http://www.unep.org/geo/yearbook/yb2003/images/fresh\\_img\\_g\\_40.jpg](http://www.unep.org/geo/yearbook/yb2003/images/fresh_img_g_40.jpg)

Architectural Engineering  
Mechanical Option

# Ft. Detrick DMLC Frederick, MD

## Architectural/Site Breadth Study

### Goal 5 – Improve Sustainability

Construction Cost Summary - FWS Constructed Wetland

Excavation/Compaction	\$8,668.80
Soil/Gravel	\$2,786.40
Liner	\$12,267.90
Plants	\$5,495.40
Plumbing	\$9,481.50
<b>Total</b>	<b>\$38,700.00</b>

### Constructed Wetland

- Building uses 24,300 gal/day (max. occupancy)
- 4300 ft<sup>2</sup>, 3 ft deep
- Adds **\$38,700** to first cost

# Ft. Detrick DMLC Frederick, MD

## Architectural/Site Breadth Study

### Goal 5 – Improve Sustainability

Penn State University

Architectural Engineering  
Mechanical Option

# Ft. Detrick DMLC Frederick, MD

## Electrical Breadth Study

### Goal 3 – Maintain Affordability

Cost of Electrical Additions

Added	Qty.	Cost per 100 LF	LF	Total Cost
#10 Wire	6	59.50	36	\$129
25 A Breaker	6	-	-	\$4,074
			<b>Total</b>	<b>\$4,203</b>

Cost of Electrical Subtractions

Subtracted	Qty.	Cost per 100 LF	LF	Total Cost
#3 Wire	6	196.00	100	\$1,176
#4 Wire	12	166.50	64	\$1,279
#12 Wire	18	47.90	128	\$1,104
70 A Breaker	6	-	-	\$4,818
80 A Breaker	12	-	-	\$4,818
15 A Breaker	18	-	-	\$4,074
Panel DP5	1	-	-	\$4,000
			<b>Total</b>	<b>\$21,268</b>

- Equipment reduction means power reduction
- Panelboard DP5 can be eliminated
- Reduces first cost by \$17,065
- **Total cost additions from breadth: \$21,635**

# Ft. Detrick DMLC

## Frederick, MD

### Conclusions and Recommendations

- Total First Cost of Redesign:  $\$384,050 + \$21,635 = \$405,685$
- Total 20-Year Life Cycle Cost Savings: **\$131,058**
  - Payback period still only **5.2 years**
- Owner would pay \$109,685 more up-front, but would save \$131,058 after 20 years

# Ft. Detrick DMLC

## Frederick, MD

## Conclusions and Recommendations

### Goals Met:

1. Decrease Space
  - *YES. DOAS units take up 2% less space than existing AHUs*
2. Increase Energy Efficiency
  - *YES. Smaller quantity of air to condition; Enthalpy wheel provides energy recovery*
3. Maintain Affordability
  - *YES. Higher first cost pays back in 5.2 years with savings on energy.*
4. Maintain Occupant Safety
  - *YES. DOAS takes longer to clear the building, but the building never reaches a critical level.*
5. Improve Sustainability
  - *YES. 6 credits from mechanical redesign + 1 credit from wetland = 7 credits needed for SPiRiT Gold.*
