Slide Total: 40

- 1. Self Introduction (1)
- 2. Project Overview (1)
- 3. Theme/Overall Goal of Energy Savings (1)
- 4. Overview of Analysis (1)
- 5. Analysis I (Backup Generator analysis) (10)
  - a. Area of Potential Improvement (1)
  - b. Proposed Solution (1)
  - c. Benefits and Drawbacks (1)
  - d. Resulting Energy Savings (3)
  - e. Sound Attenuation (Breadth I Acoustical) (2)
  - f. Schedule Impact and Constructability Review (1)
  - g. Conclusions (1)
- 6. Analysis II (Green Roof Analysis) (10)
  - a. Area of Potential Improvement (1)
  - b. Proposed Solution (1)
  - c. Benefits and Drawbacks (1)
  - d. Description of Existing Design (1)
  - e. Proposed Changes (1)
  - f. Structural Load Analysis (Breadth II Structural) (1)
  - g. Resulting Energy Savings (Breadth III Mechanical) (1)
  - h. Cost Analysis (1)
  - i. Schedule Impact and Constructability Review (1)
  - j. Conclusions (1)
- 7. Analysis III (Curtain Wall Redesign) (9)
  - a. Note Regarding this Analysis (0)
  - b. Area of Potential Improvement (1)
  - c. Proposed Solution (1)
  - d. Benefits and Drawbacks (1)
  - e. Description of Existing System (1)
  - f. Proposed Changes (1)
  - g. Energy Savings (Breadth III Mechanical) (2)
  - h. Cost Comparison (1)
  - i. Schedule Impact and Constructability Review (1)
- 8. Analysis IV (Smart Power Strip Analysis) (4)
  - a. Area of Potential Improvement (1)
  - b. Proposed Solution (1)
  - c. Conclusions (2)
- 9. Overall Summary (2)
- 10. Acknowledgements (1)
