

Kale Mullikin  
Medical Office Building  
Mechanical Option  
Advisor: Dr. Rim

1. Introduction (1)
2. Presentation outline (1)
3. Building use summary
  - a. Rooms in the building and purpose (1)
4. Existing mechanical conditions
  - a. Design conditions (1)
  - b. TRACE load calculations (1)
  - c. Existing cost analysis (1)
5. Geothermal Depth
  - a. Reason for choosing this proposal (1)
  - b. Criteria for evaluation (1)
  - c. Define geothermal system and its advantages (1)
  - d. Changes in rooftop units (1)
  - e. Summary of calculations for bore length (1)
  - f. Define three loop possibilities (vertical, horizontal, pond) (1)
    - i. Analysis of vertical loop (1)
      1. Layout
    - ii. Analysis of horizontal loop (1)
      1. Layout
  - g. Yearly geothermal cost savings (1)
    - i. Results from TRACE
  - h. Cost analysis
    - i. Rooftop unit cost (1)
    - ii. Vertical loop cost and payback (1)
    - iii. Horizontal loop cost and payback (1)
  - i. Summary of successfulness of redesign (1)
6. Electrical Breadth
  - a. Reason for need of redesign (1)
  - b. Summary of original design (1)
  - c. Changes that were made (new subpanel) (2)
    - i. Breaker
    - ii. Wire size
    - iii. Grounding
    - iv. Conduit
  - d. Redesign of wiring going to subpanel (2)
    - i. Breaker
    - ii. Wire size
    - iii. Grounding
    - iv. Conduit
7. Structural Breadth
  - a. Need for examination (1)

- b. Summary of original design (1)
  - c. Joist redesign (1)
  - d. Girder redesign (2)
    - i. Edge girders
    - ii. Center girders
8. Overall Summary (1)
  9. Acknowledgments (1)
