

ENGINEERING House Special Living Option

www.engr.psu.edu/e-house

We Are...Penn State Engineering House

Penn State Engineering House (E-House) hopes to provide students with a constructive and positive live-in community that supports projects and activities relevant to their majors within the College of Engineering. E-house is conveniently located in McKee Hall, a sector of the West Halls residence area sited next to Recreation Hall and the Lion Shrine. E-House is considered a co-ed special living option, available only to those full-time students accepted into the College of Engineering at University Park. E-House provides students with the opportunity to take on leadership roles through various executive positions and committees within the house. In addition, E-house supports numerous social events, such as sporting events and picnics, to promote a sense of community and friendship amongst its members. In order to continually improve the living environment, members of E-house have the opportunity to attend house meetings where they may offer opinions and suggestions. Overall, E-House's commitment to its members offers a comfortable living environment where engineers may share their common interests through their studies and their social involvement.
