Dr. Allan Fisher is Senior Vice President for Product Strategy and Development at the Laureate Higher Education Group, a division of Laureate Education, Inc. He leads a group of some 60 professionals in the development of new online degree programs for a number of affiliated academic institutions.

Dr. Fisher previously was co-founder, President and CEO of iCarnegie Inc., an online higher education subsidiary of Carnegie Mellon University. iCarnegie online curriculum has been adopted by institutions in more than 20 countries, is used in ten of the top 50 universities in China, and has been translated in part into Spanish, Chinese and Russian.

Before starting iCarnegie, Dr. Fisher served until 1999 as faculty member and Associate Dean for Undergraduate Education in the School of Computer Science at Carnegie Mellon University. During that time, he worked in high performance computing and networking research and also led the creation of Carnegie Mellon’s B.S. program in Computer Science, along the way authoring or co-authoring more than 50 scholarly publications. In the late 1990s, he and Dr. Jane Margolis carried out a program of research and intervention that helped to increase the proportion of women entering the computer science program from 7% in 1995 to 42% in 2000. This work is described in their award-winning book, *Unlocking the Clubhouse: Women in Computing*, published in 2002 by MIT Press.

Dr. Fisher received a bachelor’s degree in chemistry from Princeton University, studied at the University of Cambridge, and received the Ph.D. in computer science from Carnegie Mellon University. He serves on a number of advisory committees for projects and organizations working toward diversity in technology fields, including the Anita Borg Institute for Women and Technology and the National Research Council Committee on Women in Science, Engineering and Medicine.
