## **Executive Summary**

The following report analyzes the existing conditions of the power distribution system and communication systems for the building. Most of the information on these topics was contained in the construction documents and specifications. Other sources of information were the National Electric Code (NEC 2005), and correspondence with PP&L Utilities and Turner Construction.

The riser diagram in the construction documents was converted to a single-line diagram. While the riser diagram shows the spatial relationships between the distribution equipment better, the single-line diagram is a lot clearer in showing feeders between the main switchboard and subsequent equipment. On the riser diagram, there are many feeders going from the switchboard to the penthouse. The lines are very close together, and some of the lines cross, making it fairly difficult to track which feeder goes to which panelboard quickly. The single-line diagram makes this a lot clearer, and would have been an asset for the original construction document set.

After analyzing the lighting, receptacle, and mechanical loading, I determined that sizing the switchboard at 1600A was the appropriate decision, and should allow for some future growth. Full calculations for this, as well as other critical information on the power distribution system can be found in the appendices.

## **Power Distribution Systems**

### Summary Description of Distribution System

The main power for the Life Sciences & Philosophy comes from the main switchgear for Franklin & Marshall College. Power is run from existing lines in the front of the building to a basement substation at the northwest corner of the building. The 12.47KV service voltage is transformed down to 480Y/277V secondary service. Power is then distributed to various basement panels, 2 bus ducts, and the penthouse level. Each bus ducts serves one half of the building (north or south), and there are 2 electrical rooms on each floor (again, one on the north side of the building, the other servicing the south side). Most of the lighting runs on 277V. There are transformers converting the voltage down to 208Y/120 V service in each electrical room, on the penthouse level, and the main mechanical room. The 208Y/120 service is used for receptacle loads, incandescent lighting, and much of the heating for the space.

### Service Entrance

The service entrance for the building is located on the northwest corner of the building, in the main electrical room (Room #M004). The power for this building is run from existing lines that run underground on the east side of the building. These lines run from Franklin & Marshall's main switchgear (located approximate 300 ft north of the building) to the existing Central Utility Plant's switchgear (located next door, about 100 ft from the south end of the building) that services the rest of the campus via a campus loop. A new manhole was dug at the north end of the building, and new lines were run from the existing lines connecting to the building substation.

### Voltage Systems

There are two main voltage systems within the building. A 480Y/277v, 3PH, 4W service is transformed at the substation, and is used for the majority of the lighting loads, air handling units, most pumps, the boiler, and the cooling tower. A 208Y/120V, 3PH, 4W service is transformed in every electrical room in the building, in the penthouse, and in the main basement mechanical room. Receptacles, incandescent lighting, unit heaters, air conditioning, and water heaters run at this voltage.

### *Emergency Power System(s)*

The main emergency power system for the building is a 300KW diesel powered generator. Power is distributed from the generator at 480Y/277V. 2 main lines run from the generator: one at 400A and one at 100A. 2 4-pole automatic transfer switches are mounted in the penthouse to power the emergency panels, rated at 400A and 100A respectively. The main emergency panels are also located in the penthouse level, which then distribute power to basement emergency panels. Emergency power also passed through a transformer (converting to 208Y/120V service), and is distributed to emergency panels in the south electrical room of each floor.

### *Over-current Devices*

The main Franklin & Marshall switchgear is protected using a 600A fuse. The substation also is protected using a 600A fuse. All distributing panelboards and lighting panelboards are protected using circuit breakers, with 60A breakers protecting the main lighting panelboards and 200A breakers protecting the main panelboards for each floor.

### *Power Factor Correction*

After inspection of the construction documents and specifications, it does not appear that there was any power factor correction installed or required.

### *Design Issues*

The project seems to be relatively straightforward, and there does not appear to be any major electrical design issues.

### *Lighting Loads*

Recessed fluorescent fixtures are used in the classroom, lab, offices, and corridor spaces. Incandescent and halogen lighting is saved for the more decorative spaces (the Atrium and the Humanities Common Room). Most of the classrooms rely on bi-level switching, with the lecture hall and a few other spaces using dimming to lower light levels. The automatic shut-off standard in ASHRAE 90.1 is attained using time switches (both electronic time switches and electromechanical-dial time switches), occupancy sensors, and outdoor photoelectric switches.

Please see Appendix H for further details and HID ballast cutsheets.

Mechanical and Other Loads

| TOTAL LOAD      |  |
|-----------------|--|
| <u>CATEGORY</u> | <u>TOTAL LOAD IN<br/>KW PER<br/>CATEGORY</u> |
| MECHANICAL      | 383.02                                       |
| PLUMBING        | 144.23                                       |
| ARCHITECTURAL   | 120.00                                       |
| KITCHEN         | 0.00   |

Please see Appendix I for full details.

Service Entrance Size

Square Foot Method: 2000A

Square Foot Method + Actual Loads: 1600A

Actual Loads: 1600A

Please see Appendix J for full calculations and details.

Utility Company Information

PP&L Electric Utilities  
827 Hausman Road  
Allentown, PA 18104-9392  
Website: <http://www.pplelectric.com/>

The rate schedule that applies to this building is LP-4, which applies to 12.47 KV service.  
The complete rate information is in Appendix K.

## **Communication Systems**

### **Fire Alarm System**

- The main fire alarm control panel is located in the basement, and is linked to fire alarm terminal cabinets on each floor. Those terminal cabinets are linked to smoke and heat detectors throughout the floor, as well as strobe and speaker circuits and magnetic door holders. The third floor terminal cabinet also services the penthouse/roof level, where smoke exhaust is monitored and controlled. Main fire alarm control panel is in the Main Electrical Room in the basement, and the terminal cabinets are located in the North Electrical Rooms on each floor.

### **Building Control & Automation**

- For lighting, there are dimming panels and scene control devices for the major public spaces in the building. Many of the lab spaces require ventilation and temperature control, in the form of a VAV fume hood controller and a lab room controller. There are room sensors for the heating and cooling systems.

### **Multimedia & Audiovisual**

- Most of the classrooms and the teaching laboratories are equipped with ceiling-mounted data projectors and ceiling mounted speakers, along with either a mobile podium or fixed workstation with control panels for computing and sound. These systems connect to the main A/V system via floorboxes. There are motorized projection screens in the Humanities Common Room and the Lecture Hall, and manual screens in the other classroom and lab spaces.

### **Data Communications Network**

- This system was mostly the responsibility of Franklin & Marshall College Computing Services. As with most of the building, main lines for this system enter through the basement Telecommunications Room and are distributed to the other 6 telecommunications room in the building. Every classroom, lab, office, and major gathering space has at least 4 ports to plug into the building's data system. In addition, Computing Services also coordinated several wireless access points throughout the building, with the goal of having 100% blanket coverage for the building. Priority points include offices, classrooms, labs, and the Lecture Hall.

### **Cable TV & Satellite**

- Cable TV service is fed from the Central Services Building to the main Telecommunications Room in the basement (M058). From there, service is distributed to splitters in each of the 6 other telecommunications rooms in the building (2 per floor) and to two neighboring buildings.

#### Telephone / Voice Data

- OSP fiber is run from an existing fiber room in the Central Services Building to the basement Telecommunications Room. Copper cables are run from the telecomm. room in the Central Services Building to the LS&P Telecomm. Room. Service is then distributed to fiber breakout boxes, and receiving and sending boxes in each of the 6 other telecommunications rooms. Copper voice feeds are also sent to the two neighboring buildings. Every major space in the building (offices, labs, gathering spaces) has at least 2 connections to the voice data system.

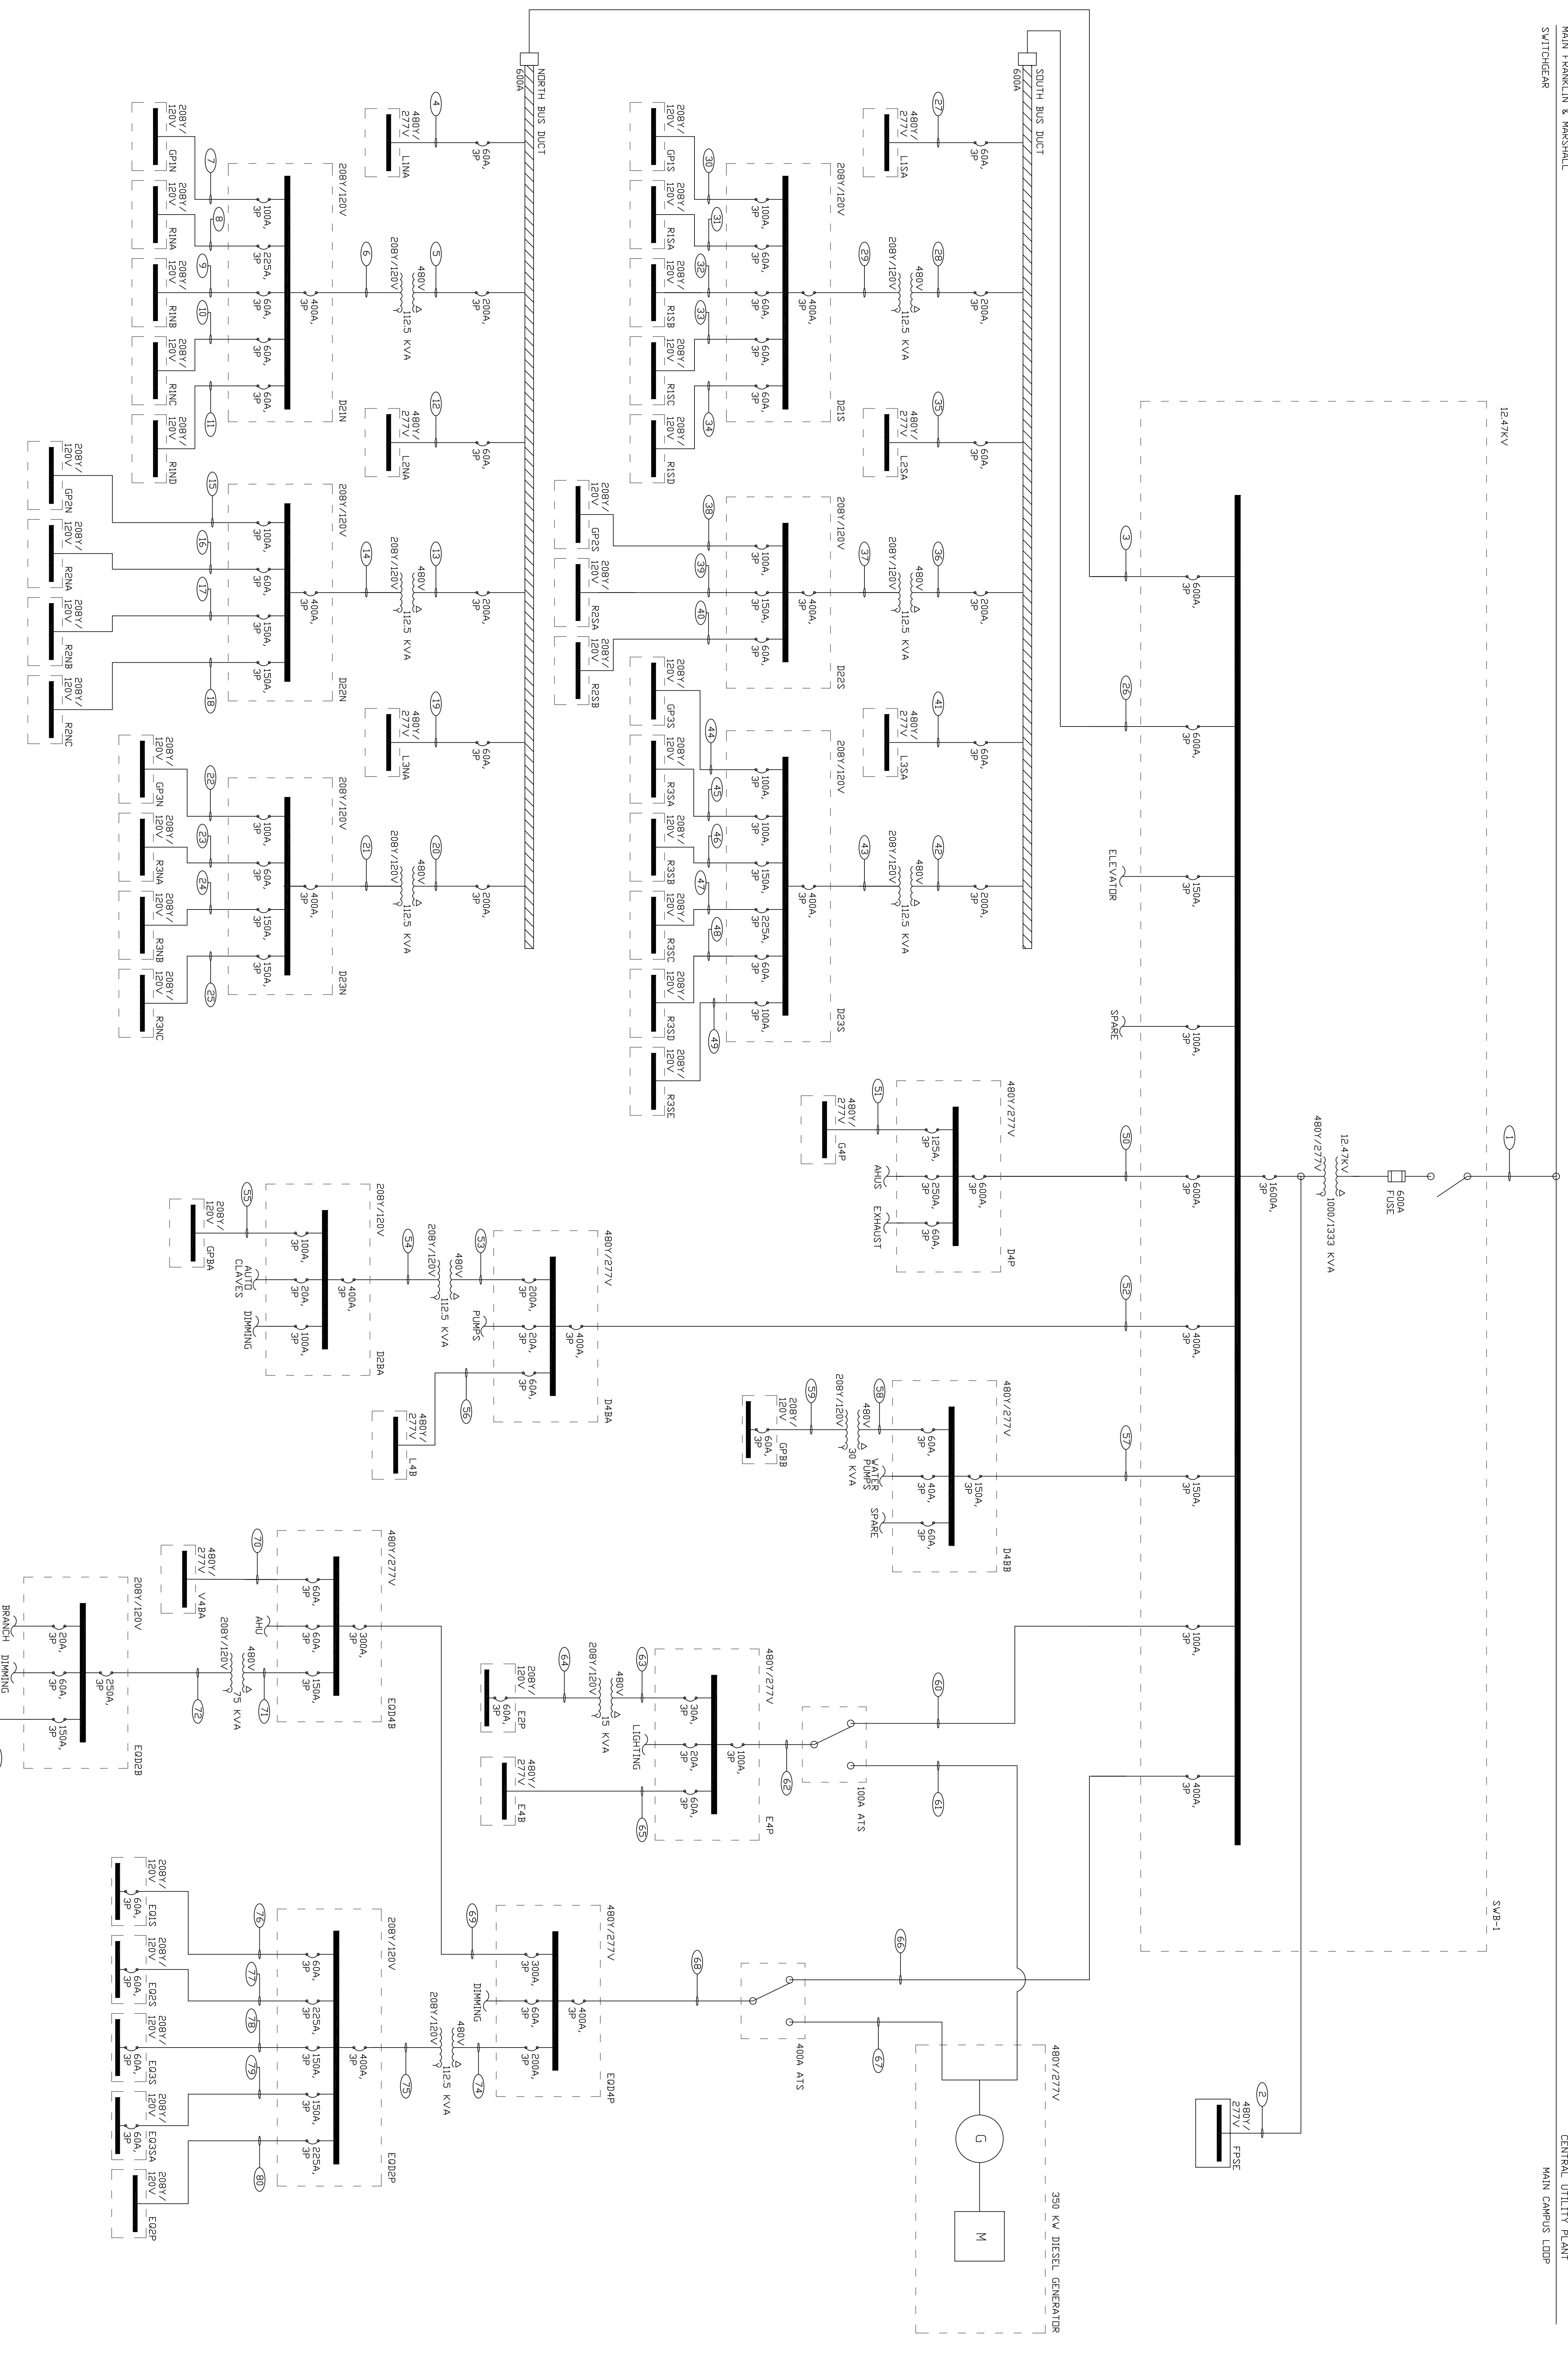

#### Closed Circuit Surveillance

- A couple of the areas of the building (namely the vivarium and the loading dock) required 24-hour surveillance, for security and monitoring purposes. Closed circuit cameras are placed around and within these areas. Main lines run through the basement telecommunications room through the telecomm and data closets on each floor. Surveillance occurs from the public safety office on campus.

#### Door Access & Control

- Several of the areas of the building, including the basement vivarium, are available only via card access for security reasons. The main control panel for this system is in the South Telecommunications Room on the first floor.

## LUMINAIRE SCHEDULE

**Metal  
Halide  
Lamp Ballast**

**Catalog Number 71A5380  
For 100W M90/M140  
60 Hz HX-HPF  
Status: Active**

**DIMENSIONS AND DATA**

Capacitor: 7C120M33-R

Capacitance: 12  
Dia/Oval Dim: 1.5  
Height: 2.9  
Temp Rating: 105°C

Ignitor: LI533-H4

Ballast to Lamp Distance  
(BTL) = 20 feet  
Temp Rating: 105°C

**Typical Ordering Information**

(please call Advance for suffix availability)

| Order Suffix | Description   |
|--------------|---|
| 500D.        | Ballast With Ignitor and Dry Film Capacitor             |
| 510D.        | Ballast w/Welded Bracket, Ignitor, & Dry Film Capacitor |
| 600.         | Ballast and Ignitor, No Capacitor                       |
| 610.         | Ballast with Welded Bracket and Ignitor, No Capacitor   |

Data is based upon tests performed by Advance Transformer in a controlled environment and representative of relative performance.  
Actual performance can vary depending on operating conditions. Specifications are subject to change without notice.

## **Appendix K:**

### **Utility Rate Structure**

**RATE SCHEDULE LP-4**  
**LARGE GENERAL SERVICE AT 12,470 VOLTS**

**(C)****APPLICATION RATE SCHEDULE LP-4**

This Rate Schedule is for large general service supplied from available lines of 12,470 volts when the customer furnishes and maintains all equipment necessary to transform the energy from line voltage. New applications with voltage levels higher or lower than 12,470 volts will not be accepted after January 1, 2005.

**NET MONTHLY RATE****Distribution Charge**

\$2.312 per kilowatt for all kilowatts of the Billing KW.

**(D)**

0.000 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.000 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.000 cts. per KWH for all additional KWH.

**Competitive Transition Charge (Effective 1-1-05 through 12-31-05)**

\$0.231 per kilowatt for all kilowatts of the Billing KW.

0.298 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.231 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.201 cts. per KWH for all additional KWH.

**Competitive Transition Charge (Effective 1-1-06 through 12-31-06)**

\$0.238 per kilowatt for all kilowatts of the Billing KW.

0.300 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.231 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.202 cts. per KWH for all additional KWH.

**Competitive Transition Charge (Effective 1-1-07 through 12-31-07)**

\$0.232 per kilowatt for all kilowatts of the Billing KW.

0.290 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.224 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.195 cts. per KWH for all additional KWH.

**Competitive Transition Charge (Effective 1-1-08 through 12-31-08)**

\$0.139 per kilowatt for all kilowatts of the Billing KW.

0.172 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.133 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.116 cts. per KWH for all additional KWH.

**Competitive Transition Charge (Effective 1-1-09 through 12-31-09)**

\$0.809 per kilowatt for all kilowatts of the Billing KW.

1.012 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.781 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.682 cts. per KWH for all additional KWH.

(Continued)

**RATE SCHEDULE LP-4 (CONTINUED)****(C)**

## Intangible Transition Charge (Effective 1-1-05 through 12-31-05)

\$0.729 per kilowatt for all kilowatts of the Billing KW.

0.927 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.715 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.624 cts. per KWH for all additional KWH.

## Intangible Transition Charge (Effective 1-1-06 through 12-31-06)

\$0.717 per kilowatt for all kilowatts of the Billing KW.

0.873 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.673 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.587 cts. per KWH for all additional KWH.

## Intangible Transition Charge (Effective 1-1-07 through 12-31-07)

\$0.679 per kilowatt for all kilowatts of the Billing KW. (D)

0.848 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW. (D)

0.654 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW. (D)

0.570 cts. per KWH for all additional KWH. (D)

## Intangible Transition Charge (Effective 1-1-08 through 12-31-08)

\$0.744 per kilowatt for all kilowatts of the Billing KW.

0.925 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.714 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.623 cts. per KWH for all additional KWH.

## Intangible Transition Charge (Effective 1-1-09 through 12-31-09)

\$0.000 per kilowatt for all kilowatts of the Billing KW.

0.000 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

0.000 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

0.000 cts. per KWH for all additional KWH.

The Company will provide capacity (KW) and energy (KWH) under this Rate Schedule for customers who receive Basic Utility Supply Service from the Company.

## Capacity and Energy Charge (Effective 1-1-05 through 12-31-05)

\$3.753 per kilowatt for all kilowatts of the Billing KW.

4.513 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

3.397 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

2.917 cts. per KWH for all additional KWH.

## Capacity and Energy Charge (Effective 1-1-06 through 12-31-06)

\$4.006 per kilowatt for all kilowatts of the Billing KW.

4.850 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW.

3.650 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.

3.138 cts. per KWH for all additional KWH.

| 5.095 cts. per KWH for the first 200 KWH per kilowatt of the Billing KW. | (I) |
| 3.841 cts. per KWH for the next 200 KWH per kilowatt of the Billing KW.  | (I) |
| 3.302 cts. per KWH for all additional KWH.                               | (I) |

**Transmission Charge****(C)**

The Company will provide and charge for transmission service consistent with the PJM Open Access Transmission Tariff approved or accepted by the Federal Energy Regulatory Commission for customers who receive Basic Utility Supply Service from the Company unless such customers obtain transmission service from another provider. The Transmission Service Charge included in this Tariff applies to all kWh billed under this Rate Schedule.

**MONTHLY MINIMUMS****(C)**

The Minimum Billing Demand is 25 KW.

The Monthly Minimum Distribution Charge is 25 KW times the demand step of the effective Distribution Charge. The Monthly Minimum Competitive Transition Charge is 25 KW times the demand step of the effective Competitive Transition Charge. The Monthly Minimum Intangible Transition Charge is 25 KW times the demand step of the effective Intangible Transition Charge. The Monthly Minimum Capacity and Energy Charge is 25 KW times the demand step of the effective Capacity and Energy Charge.

Monthly Minimums apply to services provided by the Company.

**BILLING KW**

The Billing KW is the average number of kilowatts supplied during the 15 minute period of maximum use during the current billing period.

(Continued)

## PPL Electric Utilities Corporation

### RATE SCHEDULE LP-4 (CONTINUED)

(C)

#### BILLING KW (Continued)

Time-of-Day metering and billing is available on request for an additional charge of \$13.95 per month for a minimum period of one year. The Billing KW applicable to the charges under this Rate Schedule is the average number of kilowatts supplied during the 15 minute period of maximum use during the on-peak hours of the current billing period. For new applications, this provision is limited to customers of the Company who have not had the opportunity to purchase capacity and energy from their choice of electric generation supplier pursuant to the enrollment procedures contained in the commission's order at Docket Nos. M-00960890F.0014 and M-00960890F.0015. No new applications will be accepted after January 1, 2000.

(D)

#### ON-PEAK HOURS

On-peak hours for billing purposes are 7 a.m. to 3 p.m., 8 a.m. to 4 p.m., or 9 a.m. to 5 p.m. local time, at the option of the customer, Mondays to Fridays inclusive except, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The Company's system on-peak period is 7 a.m. to 9 p.m. local time.

#### INDUSTRIAL DEVELOPMENT INITIATIVES RIDER

The Industrial Development Initiatives Rider included in this Tariff applies to eligible customers served under this Rate Schedule, except for customers served under the Economic Development Initiatives Rider.

#### ECONOMIC DEVELOPMENT INITIATIVES RIDER

The Economic Development Initiatives Rider included in this Tariff applies to eligible customers served under this Rate Schedule, except for customers served under the Industrial Development Initiatives Rider.

#### OFF-PEAK SPACE CONDITIONING AND WATER HEATING (Effective 1-1-05)

For customers served under this Rate Schedule, off-peak energy for storage space conditioning and/or water heating may be supplied exclusively through a separate submeter and billed separately at a charge of \$14.65 per month, plus a Distribution Charge of 0.387 cts. per KWH, plus the following Competitive Transition Charge, Intangible Transition Charge and, for customers who receive Basic Utility Supply Service from the Company, the following Capacity and Energy Charge, with a monthly minimum charge of \$14.65. Any billing KW resulting from usage during on-peak hours is billed at Rate Schedule charges. For new applications, this provision is limited to customers of the Company who have not had the opportunity to purchase capacity and energy from their choice of electric generation supplier pursuant to the enrollment procedures contained in the commission's order at Docket Nos. M-00960890F.0014 and M-00960890F.0015. No new applications will be accepted after January 1, 2000.

### Transmission Charge

(C)

The Company will provide and charge for transmission service consistent with the PJM Open Access Transmission Tariff approved or accepted by the Federal Energy Regulatory Commission for customers who receive Basic Utility Supply Service from the Company unless such customers obtain transmission service from another provider. The Transmission Service Charge included in this Tariff applies to all kWh billed under this Rate Schedule.

Service through the separate meter may be used between the off-peak hours of 7 p.m. to 7 a.m. local time, Mondays to Fridays inclusive, and all day Saturday, Sunday and the following holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

### COMPETITIVE TRANSITION CHARGE RECONCILIATION RIDER

The Competitive Transition Charge Reconciliation Rider included in this Tariff applies to the Competitive Transition Charges under this Rate Schedule.

### INTANGIBLE TRANSITION CHARGE RECONCILIATION RIDER

The Intangible Transition Charge Reconciliation Rider included in this Tariff applies to the Intangible Transition Charges under this Rate Schedule.

### SUSTAINABLE ENERGY FUND RIDER

The Sustainable Energy Fund Rider included in this Tariff applies to the Distribution Charges under this Rate Schedule.

### METERING AND BILLING CREDIT RIDER

The Metering and Billing Credit Rider included in this Tariff applies to the Distribution Charges under this Rate Schedule.

(C)

### DEMAND SIDE INITIATIVE RIDER (EXPERIMENTAL)

The Demand Side Initiative Rider included in this Tariff is available to eligible customers served under this Rate Schedule.

(Continued)

**RATE SCHEDULE LP-4 (CONTINUED)****(C)****GENERATION RATE ADJUSTMENT RIDER**

The Generation Rate Adjustment Rider included in this Tariff is available to eligible customers served under this Rate Schedule.

**STATE TAX ADJUSTMENT SURCHARGE**

The State Tax Adjustment Surcharge included in this Tariff is applied to charges under this Rate Schedule, except for charges under the Generation Rate Adjustment Rider.

**PAYMENT**

The above net rate applies when bills are paid on or before the due date specified on the bill, which is not less than 15 days from the date bill is mailed. When not so paid, the gross rate applies which is the above net rate plus 5% on the first \$200.00 of the then unpaid balance of the monthly bill and 2% on the remainder thereof.

**CONTRACT PERIOD**

Service under this Rate Schedule is for an initial term of one (1) year from the date service is first rendered, unless the Company and the customer mutually agree to a different term in the contract for service.
