Research possible green technologies											
Analyze loads on pile caps and redesign											
Determine productivity rates for pile caps											
Perform takeoffs for each type of pile cap											
Compare cost and schedule impacts on pile caps											
Run calculations for different green tech.											
Compare cost and seek owners approval											
Relocate and resize the mechanical system											
Perform energy analysis for both cases											
Evaluate initial and operating costs of mech system											
Determine if owner is pleased with changes											
Analyze loading requirements for steel											
Standardize steel members											
Compare schedule and cost impacts of steel
