## Shape Your Future

ENGINEER WHAT'S NEXT  
AT PENN STATE

The College of Engineering delivers unrivaled experiences for graduate students, preparing industry professionals, researchers, and educators with the capabilities to inspire change and impact tomorrow.

### EXPERIENCE A SMALL-TOWN FEEL WITH BIG-CITY AMENITIES

State College is an ideal location for graduate students searching for a welcoming community with eclectic restaurant, shopping, and entertainment options; a vibrant arts, music, and festival scene; a community rich in team spirit; and access to numerous hiking and biking trails, and a variety of other outdoor adventures.

### SOLVE PRESSING SOCIETAL NEEDS

Join a community that prioritizes interdisciplinary research collaborations that cross departmental, college, and institutional boundaries to answer vital scientific questions.

### OPEN DOORS TO NEW OPPORTUNITIES

Connect with more than 120,000 Penn State engineering alumni around the world representing all engineering disciplines and industries.

125+ year history  
of engineering excellence

20+ discipline areas

1,800 residential and online  
graduate students

50+ graduate program offerings

More than 120K global alumni

\$181M+ in research expenditures

More than 30 major college research  
labs, centers, and institutes

8 programs in the top 25 specialty  
rankings (U.S. News & World Report)

#3 in online graduate engineering  
programs overall and for veterans  
(U.S. News & World Report)

25% of our graduate students  
are women

**“We Are means community. It’s the social connections you make inside and outside the lab so you can destress and work on your professional and personal growth, then come back to the lab and do the work you came here to do. The community of graduate students and researchers is a big part of why I came to Penn State.”**

**Victoria Vasquez**  
M.S. Electrical Engineering Student
